SUMMARY

Backend developer with 16 months of production experience at Hashira.io, building Go and Rust services, data pipelines and TypeScript tooling for Garden.Finance, a cross-chain trading protocol. Built React and React Native apps; led the Rust backend of a 3rd-place Polkadot Cloud Hackathon project. Seeking SDE-1 / Backend roles.

SKILLS

Languages & Databases: Go, Rust, TypeScript, JavaScript, Python, Java, SQL, PostgreSQL, MySQL, MongoDB
Backend & APIs: Node.js, Express.js, Axum, Chi, GORM, SQLx, REST APIs, WebSockets, Socket.io, Swagger, MCP
Infrastructure & Tools: Docker, Docker Compose, AWS, Git, GitHub, Gitea, Coolify, CI/CD, Agile, Code Review
Frontend & Mobile: React.js, Next.js, React Native, Tailwind CSS, Kotlin (Android)

EXPERIENCE

Software Development Intern | *Hashira Works Pvt. Ltd. (Hashira.io)* | Hyderabad, India **Dec 2024 – Apr 2026**

- Built production Go and Rust services for Garden.Finance, a cross-chain trading protocol, including watcher services and data pipelines that process multi-chain trade data in real time
- Implemented Spark and Lightning protocol integrations in Rust for order execution and settlement
- Developed Garden Analyzer, an MCP analytics bot serving volume and user-growth metrics without manual SQL
- Shipped a TypeScript arbitrage-detection bot, a Twitter alert for $10K+ trades and a Strava-to-Discord notifier
- Maintained deployment scripts on self-hosted Gitea; worked in daily standups, sprint tracking and code review

Web Developer Intern | *InternIQ* | Remote **Mar 2024 – Apr 2024**

- Optimized web app features and fixed UI bugs; earned a Letter of Recommendation

Backend Developer Intern | *Navodita Infotech* | Remote **Feb 2024 – Mar 2024**

- Built a real-time multi-room chat app with Node.js, Express and Socket.io handling concurrent WebSocket connections; delivered early and received a Letter of Recommendation

Python Instructor (Part-time) | *NRI Institute of Technology* | Agiripalli, India **May 2022 – Aug 2022**

- Taught daily 1-hour Python sessions to 3 engineering sections as part of a 7-member paid teaching team

PROJECTS

TravelID 2.0 – *3rd Prize ($1,000), Polkadot Cloud Hackathon* Devpost | GitHub

- Designed a privacy-first document verification flow that hashes files with SHA-256 and stores only the hash, proving authenticity without exposing document contents
- Led the Rust backend, an async pipeline from upload through hash generation to on-chain submission and status tracking; co-built the React frontend with wallet login and QR sharing

Technologies: *Rust, Axum, Subxt, SQLx, PostgreSQL, React, TypeScript*

THORChain Analytics API – *Rust, Axum, Tokio, SQLx, MySQL* GitHub

- Built an async REST API and hourly background indexer that syncs THORChain pool depth, earnings, swap and RUNEPool history from the Midgard API within its rate limits into MySQL (SQLx migrations)
- Added 4 endpoints with pagination, date-range and threshold filters and sorting; documented with Swagger UI

Daichi (大智) – *React Native, Expo, TypeScript, NativeWind, GraphQL* GitHub

- Created an open-source anime streaming app with search, episode browser, video player, watch history and library (Zustand); integrated AniList GraphQL with Kitsu fallback and automated APK builds with GitHub Actions

EDUCATION & AWARDS

B.Tech in Computer Science & Data Science | *NRI Institute of Technology* | Agiripalli, India **Mar 2026**

- Member, Google Developers Club; published two Android apps (expense tracker, notes app) on Google Play
- Hackathon Winner (INR 10,000) – built DawgCoin, an ERC-20 token on Ethereum
- 1st Place, college-wide coding contest – built a SQL-based mobile app in a team of 4
